Triumph MK3 Angled

6" TRIUMPH MK3 Angled is all in one piece; not two pieces glued together. MK3 Angled features a handle tilted at a 30° angle. This model is used to scrape off old sun protection foil from window panes – a real backbreaker of a job!

3100/ANGLED

Triumph MK3 Straight

6" TRIUMPH MK3 with anti-slip ribs, ergonomic rubber handle etc. MK3 Straight comes with the original TRIUMPH 6-inch carbon steel blade and accepts blades of carbon steel as well as of stainless steel, exactly the blades that you already know

3100/STRAIGHT

Triumph 2000

6" 150 mm wide. Instead of a loose protective cover, this scraper has a built-in protective shield that is triggered with the flip of a finger. Especially developed for use by window cleaners on high-rise jobs. Comes with the original and popular Triumph carbon steel blade.

310-2000

Champion

5" 125 mm wide. A very elegant and extremely popular window scraper, where the tilt angle of the blade to the window has been reduced to a minimum. Used by professionals and by DIY enthusiasts who prefer to clean their windows themselves.

Handy MK2

3" 80 mm wide. A handy little scraper that can be used by anyone to obtain professional results. Unbeatable for removing old paint and labels from windows.

320-0

Handy MK2 Angled

3" 80 mm wide. The 15° angle makes it easy to work with the scraper. Use it if you are going to remove paint, mud and other debris from glass of turn able windows. Or use it if you are going to clean the inside of an aquarium.

320-0ANGLED

Long Handy Angled

3" HANDY300 is a specially designed all-purpose scraper with a 300 mm long handle with a 15° angle. Both scraper models are available with a 80 mm wide carbon steel blade and as an Aqua model with a 70 mm wide stainless steel blade.
